

**APICS Professional Development Meeting
Wednesday, March 17, 2010, 5:30PM**

Plant Tour, NextStep Recycling, *Tour Guide: Enid Lepton*

Join us for an educational evening, a FREE plant tour at NextStep Recycling. Enid Lepton, Business Solutions Manager will be giving the tour. This is the perfect way to celebrate “Green”, on St. Patrick's day!

Manufacturing based on donations? Is this MRP logic, backwards? Come and find out!

About NextStep:

NextStep has grown from its initial beginnings as a Macintosh computer fix-it-and-pass-it-on resource into a thriving community service organization. Founded in 2002 as MacRenewal, a 501(c)(3) public nonprofit public organization, we are now known as NextStep Recycling. We implement our three-part mission through focused efforts in Lane County Oregon, other areas of the state, and internationally.

Since 1999, NextStep has accepted donations of hundreds of thousands of computers and other electronic devices. In the process, we have put thousands of pieces of equipment back into use in the community—including 18,000 refurbished computer systems (current to June, 2009) and thousands of items sold at an extremely low cost through our ReUse Store—and recycled over 6,200,000 pounds of electronic waste (e-waste). More than 1700 volunteers have donated over 136,000 hours of service refurbishing and recycling computers. Of those volunteers, hundreds have enhanced their employment marketability through experiential service learning and extensive training by our staff.
